A highly motivated and results-oriented business analyst with a proven track record in SDLC, requirements gathering, and operations management. Possesses a strong understanding of cybersecurity and distributed systems at an academic level, paired with a natural knack for fostering collaboration and facilitating stakeholder alignment in dynamic environments. Exhibits expertise in functional and non-functional requirements gathering, complemented by a solid foundation in solution analysis and elaborate technical documentation. Eager to step into a business analyst role, where I can apply my coordinating, analytical, and communication skills to manage stakeholder relationships, support solution delivery, and contribute to driving business growth through operational efficiency.

Technical Skills

- Coding Languages:
C, Java, JavaScript*, HTML/CSS, PHP*, C#*, Python*, C++*, SQL, JQL**
 - Networking:
Basic VLAN, AD, ADDC, DHCP, RODC Configuration (Based on Cisco Packet Tracer and Oracle VM VirtualBox)*
 - Hands on Experience Tools:
*VMWares : Oracle VirtualBox, Windows, Horizon VDI
Jira, Confluence, MS Office, Avalanche Console, Celigo Console*, DataDog apm, Dbeaver, Oracle DB*, MS Power BI*
Wireshark*, Firedeamon*, OpenSSL*, Tenable Nessus*, Linux**
- *Basic**

Soft Skills

- Observational, Analytical, and Detail-Oriented
- Communication (Verbal / Written) (English / Sinhala)
- Elaborated Documentation
- Task Management and Problem-Solving Skills

Academic Projects

- Pheonix OCR | Level II - Group Project
Contributed to collaborative teamwork. Used HTML, CSS, NodeJS, JavaScript, and Tesseract OCR, demonstrating a web application.
- Edge-Based e-Voting System with MPC | Final Year Project
Designed and analyzed a secure, distributed electronic voting architecture focusing on data privacy and integrity. Authored a comprehensive technical research manuscript detailing the network infrastructure and database constraints for the system design.
